PROFESSIONAL SUMMARY

Java backend developer owning production disbursement and bill-payment services with Spring Boot and PostgreSQL. Built disbursement middleware from scratch supporting over NGN 40.85 billion in successful payouts and a successful production batch of one million records. Hands-on experience in payment integrations, asynchronous processing, JUnit testing, database migrations and operational monitoring, complemented by technical support experience at Paystack.

TECHNICAL SKILLS

Backend: Java 17/21, Spring Boot 3, Spring Security, Spring Data JPA, Hibernate, REST APIs, SOAP, microservices

Data and messaging: PostgreSQL, SQL, Flyway, Apache Kafka, asynchronous batch processing, scheduled jobs

Testing and operations: JUnit, Docker, Grafana, Git, Maven, Swagger/OpenAPI, AWS S3

Security: JWT/RS256, RSA signatures, HMAC, webhooks, role-based access controls

PROFESSIONAL EXPERIENCE

Redtech Limited | Lagos, Nigeria

Java Backend Developer | Full-time | Jan 2025 - Present

- Built and own production disbursement middleware from scratch, connecting authentication, wallet, banking and payout services; the platform has supported over NGN 40.85 billion in successful disbursements.
- Successfully processed a production batch of one million records; improved processing stability and efficiency through asynchronous execution, controlled concurrency and Hibernate flush/clear operations.
- Implemented instant, scheduled and recurring disbursements, Excel bulk uploads, sequential approvals, KYC checks, balance validation and approval reminders.
- Built transaction-level retry workflows and configurable commission calculations to support payout recovery and fee processing.
- Took ownership of PaySub during early development and developed it into a production bill-payment service now used by customers.
- Integrated BuyPower, PayU, Ringo, Quickteller/Interswitch, Raven and AEDC through REST and SOAP; implemented provider routing, product mapping and pending-transaction requery.

PROFESSIONAL EXPERIENCE CONTINUED

Redtech Limited

Java Backend Developer | Jan 2025 - Present

- Developed wallet balance and transaction-history functionality, with database locking for concurrent balance updates, plus Kafka retries and dead-letter handling for failed transfers.
- Wrote JUnit tests across disbursement business logic; manage database migrations and Docker environments, and use Grafana for operational monitoring.
- Implemented JWT authentication and request-signature validation; investigate provider failures, database constraints and transaction-state issues with QA, frontend and product teams.

Paystack | Remote

Technical Support Specialist | Full-time | Feb 2025 - Sep 2025

- Investigated payment API, webhook and plugin integration issues for developers and merchants, guiding troubleshooting within support service-level expectations.
- Maintained technical guides and troubleshooting documentation; escalated recurring integration issues to engineering and product teams.

SELECTED PROJECTS

ResolveX | Payment Exception Resolution Platform

Java 21 | Spring Boot | Private project

- Built a multi-tenant platform for investigating payment discrepancies, verifying provider status and managing transaction recovery workflows.
- Implemented deterministic status transitions, tenant isolation, idempotency and evidence trails, with AI-generated suggestions to support investigations and human review.

Horizontal Bank | Financial Application

Java | Spring Boot | PostgreSQL | Hibernate | Docker

- Built backend functionality for account management, fund transfers, digital card issuance and transaction notifications, exposing REST APIs with containerized deployment.

ProTrack | Authentication and Authorization

C# | .NET 8 | Entity Framework Core | PostgreSQL

- Developed organization-aware authentication and authorization covering invitations, role assignment, permissions and department membership; implemented RSA-signed JWT claims.

EDUCATION AND TRAINING

BloomTech | Backend Development Program | 2023 - 2024

Completed

ALX Software Engineering School | Software Engineering Program

Nov 2022 - Mar 2024 | Completed
